Hey! Thanks for your response, I think there is definitely concern about OER's being worse than their paywall counterparts, although I think a lot of that can be attributed to stigma. The advancement of OER's in the future will involve education and awareness on the nature of OER's and education in a traditional sense, with resources such as this course! Further, I think the advancement and adoption of Indigenous knowledge and practices will also participate in the adoption of open learning.
